OVERVIEW:

- ✔ Over 2000 acres of privately owned land - we only sell what we grow.
- ✔ Incorporated in 2008 - growing veg for the local market.
- ✔ Licensed and approved exporter of fresh produce since 2015.
- ✔ Family ownership and commitment to sector is long term.
- ✔ Robust planning with major investments planned.
- ✔ Current Exports are 105,00 tons annually with aims to increase to 500,000 tons.
- ✔ Potential to support 500,000 tons annually-capable of managing agreed supply programs.
- ✔ Value addition: pack and label at source.
- ✔ Waste management is a key focus, in particular larger amount of composting.
- ✔ Farming at different ecological zones to deliver a wide range of crops.
- ✔ Superb water storage and borehole capabilities that allow ample water supply.

INFRASTRUCTURE:

- 1 Dam: 200,000 cubic meters to allow full irrigation with pressure compensated drips.
- 2 Water Pan: 10,000 cubic meters as back up for the main dam to ensure year round supply of water.
- 3 Packhouse: Modern packing facilities based on farm for maintaining freshness.
- 4 Stand by Generators to ensure packing is never interrupted by power supply.
- 5 Shade house growing for uniform quality and consistent supply.
- 6 Modern Propagation Unit: Capacity to do 500,000 seedlings per week.
- 7 Workshop: Maintenance and fabrication of farm machinery and equipment.
- 8 Farm Equipment: Accurate land preparation and cultivation by crop rotation and world class equipment.

WELLFARE & CSR:

We supply staff housing for those wanting to live on the farm.

We work with local community for water security and stewardship.

MISSION:

To sustainability grow and deliver top quality fresh produce, whilst making a positive impact on environment and local communities.
